

Fishing Activity

22 August 2024

Thursday 22nd was mild weather and good tides for fishing. St Kilda was selected as it potentially offered the best range of fish. Gadget and Nick headed out in the Breeze closely followed by Spike and Mike in Osprey. Initially we tried the Black Pole, Star Wreck and Circles with somewhat limited results. Around midday they started to bite with Gadget on pippi's and Nick on his blood-worms. Calm seas and an outgoing tide initially which delivered a range of fish. Goatfish, weedy whiting, KGW and a small bluey were all brought on board and some fed to some hungry pelicans. Gadget and Nick were able to 'hone' their skills by catching so many fish, mainly KGW.

Goatfish and
weedy whiting

On returning to the boat ramp we were greeted by a Marine Safety Officer who checked all the safety gear and gave us a huge tick of approval. Not so the boat alongside who weren't wearing PFD and didn't have some of the required safety equipment. We divided the catch between us and headed for home..... Somewhat empty handed! A good day on the water. Spike and Mike went further a field and caught 1 keeper KGW early in the day. I was pleased that the blood-worms proved successfully in catching the KGW and other fish. All good for our next fishing adventure. **Nick**
